

# IMPORTANT FITTING NOTICE

## CONCENTRIC SLAVE CYLINDER FORD/MAZDA

**Ford Fiesta, Ka, Focus, Puma, Courier & Mazda 121**

OE Numbers XS41 7A564 EA & 1E00 16 540 /A have undergone a design change, with the original cast aluminium unit being replaced by a new plastic version.

The old cast unit had a conventional bleed nipple, whereas the new plastic version comes with a quick release nipple. This however, is larger than the original cast one and therefore will not fit through the holes in the gearbox of earlier vehicles which have 17mm diameter holes.

Therefore VCK6000 is now the later OE equivalent plastic type and a new part number VCK6048 has been created specifically for vehicles with the earlier gearbox.

**VCK6000**

**VCK6048**
